

COURSE DATASHEET

Semester:	2015/16/1
Course:	Organic chemistry II.
Code:	VEMKOK1112A
Responsible department:	Department of Organic Chemistry
Department code:	MKOK
Responsible instructor:	Dt. József Bakos

Course objectives:

Educational Objectives: Basic principles and systematics in organic chemistry.

Course content:

Contents: Week 1. Unsaturated, aliphatic carbonyl compounds. Ketenes. 2. Conjugated, unsaturated and aromatic carbonyl compounds 3. Dicarboxyls. 1,2- and 1,3-dicarboxyls. Quinones. 4. Hydroxyoxo compounds. Sugars. Mono-, di-, and polysaccharides. 5. Carboxylic acids. Aliphatic and aromatic carboxylic acids. 6. Substituted carboxylic acids. Dicarboxylic acids. Unsaturated carboxylic acids. 7. Carboxylic acid derivatives. Anhydrides, carboxylic acid halides, esters, amides, imides, nitriles, lactams, and isocyanides. 8. Sulphur-containing organic compounds. Thiols, thiophenols, sulphide, sulfonic acids, sulfenic acids, sulphinic acids and derivatives. Detergents. 9. Amines. 10. Amino acids and peptides. 11. Nitrozo- and nitro compounds. 12. Organometallic compounds. 13. Carbonic acid derivatives. Thio- and dithiocarbonic acid derivatives. 14. Heterocyclic compounds Five- and six-membered rings with one or two heteroatoms. Fused heterocycles. Heterocyclic alkaloids. 15. Nucleosides, nucleotides, and nucleic acids. RNS and DNS. The genetical code.

Requirements, evaluation and grading:

Examination: Test

Required and recommended readings:

Markó-Farády: Szerves kémia I-VIII Lempert Károly: Szerves kémia Kajtár Márton: Változatok négy elemre: Szerves kémia
