

# **UNIVERSITY OF PANNONIA**

# **COURSE DATASHEET**

2012/13/1
Machine Industrial Technologies
VEMKGEB312G
Department of Mechanical Engineering
MKGE
dr. Pál Horváth

#### Course objectives:

The students will be able to apply in practice the informations given about the following fields.

#### Course content:

Introduction in machining technology. The structure of the machining technologies. Classification of the manufacturing processes. Basics og the cutting procedure. The mechanism of cutting. Classification of the cutting tools. Geometry of the cutting tools. Tool life and materials. Turning, milling, shaving. Finishing. Grinding. Machine tools The quality and economics of the machining technologies. Optimal machining parameters.

## Requirements, evaluation and grading:

1 test paper + 1 Laboratory report.

## Required and recommended readings:

Bálint L.-Gribovszki L.: A gépgyártástechnológia alapjai, Bp., TK. 1979.
