

COURSE DATASHEET

Semester:	2016/17/1
Course:	Technical Fluid Mechanics and Thermodynamics
Code:	VEMKGEB232V
Responsible department:	Institute of Mechanical Engineering
Department code:	MKGEI
Responsible instructor:	Dr. Sándor Verdes

Course objectives:

To make the students acquainted with the machines of fluid technic. Measuring of characteristics some thermal apparatuses

Course content:

General knowledge about the measuring, the working conditions. Making the laboratory record. Rules of the work in the laboratory, electrical apparatuses, high pressure mediums (steam, compressed air) quickly rotating parts. Measuring of distribution of velocity of a gas running in cylindrical tube. Characteristic curve (P-V) of a fan. Examination of type of the flow. Coefficient of pipe friction. Characteristic curves of a centrifugal pump. Examination of a tube in tube type heat exchanger. Calculation of hydraulic resistance of a heat changer with measuring on a model. Measuring the heat transfer coefficient with respect boiling. Indicating of a cylinder of a Whortington-pump. Measuring of centrifugal pumps in series and in parallel. Calibration of a metering elbow pipe. Characteristic curve of a metering orifice Test paper. Supplying of measurement.

Requirements, evaluation and grading:

Taking part in lab. exercises, successful test

Required and recommended readings:

Baróti-Bálint-Bordás-Pálma-Szalay-Veres-Zsiros: Gépek üzemtana laboratóriumi gyakorlatok, VE 1995.
