

SUBJECT DATASHEET

Semester:	2009/10/1
Subject:	Soil- and Groundwater Protection
Code:	VEMKKVB112T
Responsible department:	Department of Environmental Engineering
Responsible department code:	MKKV
Responsible lecturer:	Dr. Erzsébet Horváth

Educational objectives:

knowledge in remediation technologies

Detailed content of the subject:

1. Determinating parameters of migration of pollution in the soil; 2. Different water soluble and/or mixing pollutions in the soil and ground water; 3. Non-soluble pollutants 4. Reactions and degradation processes of pollutants in the soil and ground water; 5. Planning excercises of soil and groundwater protection for landfills I. 6. Planning excercises of soil and groundwater protection for landfills II. 7. Protection of ground- and drinking water 8. Sizing of protecting area; 9. Exploration of polluted area I.; 10. Exploration of polluted area II.; 11. Analysis of inorganic pollutions; 12. Analysis of organic pollutions; 13. Remediations, technologies; 14. Test 15. International experiences of remediated areas;

Requirements:

test efficiency
