

COURSE DATASHEET

Semester:	2012/13/1
Course:	Thesis
Code:	VEMKKMB1XXS
Responsible department:	Department of Environmental Engineering
Department code:	MKKV
Responsible instructor:	Dr. Ákos Rédey

Course objectives:

Trying to teach students to do complex tasks on their own.

Course content:

Here we speak about an environmental project that can be executed by the students during the 7th semester on the basis of their previous studies. They are coordinated by a consultant. Students have to prove that they are able to survey the literature of a given field of study and then to use this knowledge in their researches. Students need to be able to summarise their work and results efficiently.

Requirements, evaluation and grading:

Handing in the thesis up to the dead-line. Tehsis defence.

Required and recommended readings:

Relating literature (in connection with the chosen theme).
