

COURSE DATASHEET

Semester:	2014/15/2
Course:	Waste Management
Code:	VEMKKVB212H
Responsible department:	Department of Environmental Engineering
Department code:	MKKV
Responsible instructor:	Róbert Kurdi

Course objectives:

To get theoretical as well as practical knowledge in the field of waste management.

Course content:

1. Definition and types of waste. 2. Subject and regulation of waste management. 3. The establishment and recording of the amount and composition of the generated waste. 4. Collection and transportation of wastes. 5. Physical and physical-chemical procedures in the waste treatment. 6. Chemical procedures in the waste treatment. 7. Immobilization and solidification in the waste treatment. Vitrification and molten salt immobilization technologies. 8. Waste incineration. 9. Pyrolysis and plasma technologies. Wet oxidation procedures. 10. Waste disposal by biological methods. 11. Processes in landfill sites. 12. Environmental requirements of the establishment and operating of landfill sites. 13. Operating, closing and after-treatment of landfill sites. 14. Written examination. 15. The fate of wastes in the nature.

Requirements, evaluation and grading:

According to the requirements of fulfillment.

Required and recommended readings:
