

COURSE DATASHEET

Semester:	2014/15/2
Course:	Environmental Monitoring I.
Code:	VEMKKVB222K
Responsible department:	Department of Environmental Engineering
Department code:	MKKV
Responsible instructor:	dr. József Kovács

Course objectives:

Practical applying the chemical, biological and environmental analytics subjects and complement with the informatics knowledge in order to the students deep their studies on the field of complex effects and effects of the environmental elements on the basis of measured parameters.

Course content:

1. Definition and instrumental system of environmental monitoring. Development trends 2. Basic requirements of environmental monitoring system: measure, data acquisition and handling 3. Role of the international monitoring system (GEMS, EMEP). Three level monitoring. 4. Satellite monitoring, Atmospheric monitoring. 5. Settled and mobile monitoring systems. Object of the environmental monitoring: monitoring of the physical and chemical properties of the ambient air. 6. Continuous air monitoring systems. 7. Periodically work air monitoring systems (RIV). Reliability of the air-sampling methods. 8. Air monitoring on the work-places. 9. Continuous emission monitoring. Monitoring of the gas, vapour, particles and aerosol components. 10. Monitoring systems for water monitoring. Water quality design based on the data base of water monitoring systems. 11. In-line, on-line and off-line water monitoring systems. 12. Soil monitoring: Collecting of the reliability chemical composition data from soils. 13. Control of the composition of soils and ground waters. Control of landfills. 14. Environmental noise monitoring systems. Noise monitoring points. Complex monitoring systems. 15. Consultation. Written examination

Requirements, evaluation and grading:

According to the requirements of fulfillment.

Required and recommended readings:

EPA Handbook; Continuous Air Pollution Source Monitoring Systems EPA/625/6-79/005. David M. Nielsen: Practical Handbook of Groundwater Monitoring ISBN 0-87371-124-6 James A. Jahnke: Continuous Emission Monitoring, 2nd Edition, 2000. ISBN: 0-471-29227-3
