

COURSE DATASHEET

Semester:	2016/17/1
Course:	Testing of Structural Materials
Code:	VEMKSIM510S
Responsible department:	Institute of Materials Engineering
Department code:	MKSI
Responsible instructor:	dr. Éva Makó Kristófné Dr.

Course objectives:

The students attain knowledge in theory and practice of several modern research equipments of structural materials. The investigations can relate to his/her diploma work.

Course content:

Selection of research methods. The students attain knowledge in the theory of methods and make analyses. Preparation of report about methods and analyses.

Requirements, evaluation and grading:

Preparation of report about the theory of methods and the experiments.

Required and recommended readings:

Literatures related to the methods.
