

SUBJECT DATASHEET

Semester:	2010/11/2
Subject:	Electronics
Code:	VEMKFIB212E
Responsible department:	Institute of Physics and Mechatronics
Responsible department code:	MKFI
Responsible lecturer:	dr. István Szalai

Educational objectives:

The aim of the study is to learn the basic elements of electronics.

Detailed content of the subject:

1. Passive electronic devices and circuits. 2. Diodes and diode circuits. 3. Bipolar and unipolar transistors, basic circuits. 4. Amplifiers, differential amplifiers, feedback and operational amplifiers. 5. Basic operational amplifier circuits. 6. Electronic interfaces for sensors. 7. Active filters and oscillators. 8. Basic power electronics, voltage regulators, DC-DC converters. 9. Basic logic concepts, combination and sequential circuits. 10. TTL and CMOS circuits and their applications. 11. DA and AD converters. 12. Optoelectronics, basic circuits and application. 13. LED and LCD displays. 14. Microprocessors and microcontrollers.

Requirements:

exam
