

# UNIVERSITY OF PANNONIA

## SUBJECT DATASHEET

<b>Semester:</b>	2009/10/2
<b>Subject:</b>	Chemical Process Control (practice)
<b>Code:</b>	VEMKFO3233A
<b>Responsible department:</b>	Department of Process Engineering
<b>Responsible department code:</b>	MKFO
<b>Responsible lecturer:</b>	dr. Lajos Nagy

---

**Educational objectives:**

To practice solving of algorithm level problems with synthesis of chemical and control engineering principles.

**Detailed content of the subject:**

Using of Matlab/Simulink Black box models State-space models Identification Design of feed-forward controllers Design of continues PID controllers - || - Design of digital controllers - || - Direct synthesis method. Internal Model Control (IMC). Neural network and fuzzy logic controllers Model Predictive Control Multivariable Control Techniques Control in the coordinated level. Plant wide control

**Requirements:**

Required and suggested references: Szeifert F., Chován T., Nagy L.: Szabályozáalgoritmusok - Szabályozástervezés VE jegyzet, VE 4/95., Veszprém, 1995. Seborg, D.E., Edgar, T.F., Mellichamp, D.A.: Process Dynamics and Control, John Wiley. New York (1989). Requirements: Completing midterm examinations. Possibilities for repeating the subject: Repeated examination on the course content. Accepted equivalent subjects: Learning efforts necessary to satisfy the requirements of the subject: Learning of the course material.

**Required and suggested references:**
